

WHITMORE, Harold James

DOB: March 8, 1945 | Age: 77 yrs | Sex: Male | MRN: SMC-04471932

Encounter Date: February 14, 2023 | Provider: Priya Nair, MD — Endocrinology | Doc ID: RFH-2023-0214-BONE

Bone Health / Metabolic Consultation

Osteoporosis after Fragility Fracture — DEXA Review

Subjective

77-year-old seen after fragility distal radius fracture (01/2023, now casted). Reviewing bone density and secondary causes. Long-term risk factors: prior androgen deprivation therapy (2013-2015), age, prior smoking, glucocorticoid exposure (COVID 2020).

DEXA Bone Densitometry (02/06/2023) — Results

Lumbar spine (L1-L4) T-score −2.4. Left femoral neck T-score −2.7. Total hip T-score −2.5. Findings consistent with osteoporosis. 10-year FRAX major osteoporotic fracture risk elevated (with prior fragility fracture).

Metabolic Bone Labs

Test	Result	Units	Reference Range	Flag
25-OH Vitamin D	22	ng/mL	30 - 50	L
Calcium (corrected)	9.2	mg/dL	8.6 - 10.2	
Phosphate	3.4	mg/dL	2.5 - 4.5	
PTH, intact	78	pg/mL	15 - 65	H
eGFR (CKD-EPI)	36	mL/min/1.73 m2	> 60	L
TSH	1.9	mIU/L	0.4 - 4.0	

Assessment

1. Osteoporosis (T-score −2.7 femoral neck) with a fragility fracture — high fracture risk. Contributing: prior ADT, vitamin D insufficiency, secondary hyperparathyroidism (CKD-related).
2. CKD stage 3b — limits bisphosphonate use (eGFR 36; bisphosphonates generally avoided <30-35).

Plan

- Start denosumab 60 mg subcutaneously every 6 months (preferred in CKD; not renally cleared) — ensure calcium/vitamin D replete first to avoid hypocalcemia.
- Replete vitamin D: cholecalciferol 2000 IU daily; calcium 1000 mg/day (diet + supplement).
- Treat CKD-mineral bone disease with nephrology input.
- Falls prevention: PT, home safety, medication review for orthostasis.
- Repeat DEXA in 2 years; monitor calcium after denosumab.

Bone-Health Medications

Medication	Dose	Route	Frequency	Indication
Denosumab	60 mg	SC	Every 6 months	Osteoporosis (CKD-appropriate)
Cholecalciferol (Vit D3)	2000 IU	PO	Once daily	Vitamin D repletion
Calcium carbonate	1000 mg	PO	Daily (divided)	Bone health
